Re: Knock-off HG2 RUNNER® Lighting Systems being sold

To Whom It May Concern:

We value our business relationship with your agency, so we are writing to inform you that our patented HG2 RUNNER® lighting system is being copied by other companies without our authorization or permission. One of our distributors recently asked us to make warranty repairs to a product that resembled an HG2 RUNNER®, but, upon inspecting the product, we discovered that it was an inferior knock-off product. Please ensure that you are only selling authentic HG2 products to your customers and not any inferior or unauthorized copies. If there is any question about a particular product, please contact us.

HG2 has long been an innovator in the field of automobile lighting. Our HG2 RUNNER® is covered by US Patent No. 8,480,253, entitled “Vehicle Exterior Lighting Systems and Methods” (“the ‘253 Patent”). Certain of the unauthorized, knock-off products we have seen in the market infringe the claims of the ‘253 Patent in violation of Section 271 of the Patent Act.

We have invested, and continue to invest, a great deal of time and resources in protecting our brand, our technology and products and our reputation, including pursuing patent and trademark protection. As we discover these authorized and infringing products in the market, we are taking steps to enforce our patent and intellectual property rights and stop these infringers from copying our products and designs and making, distribution and/or selling infringing products. Our authentic products are sold and distributed with our trademarks, such as HG2 RUNNER®, on them to make them easy for our customers to identify as authentic and authorized HG2 products.

We have also invested in making sure that we are selling products that meet or exceed industry standards. Unlike these unauthorized, knock-off products, our HG2 RUNNER® is officially SAE J595 Class 2 Certified, meaning it meets industry standards for lighting intensity on emergency vehicles. As far as we know, none of the unauthorized copies of our products we are aware of have received any certification whatsoever.

Please let us know if you encounter emergency vehicles using a product that resembles our HG2 RUNNER®, but does not include our “HG2 RUNNER®” Trademark. We also request that if you are currently purchasing any products that resemble the HG2 RUNNER®, but do not carry our trademark, that you not do so, and inform us of the seller accordingly so that we may investigate whether they infringe our patent or other intellectual property rights. If you have questions about our intellectual property rights as it relates to a particular product, please feel free to contact us and we can put you in touch with our intellectual property law firm, GrayRobinson, PA.

Please contact us at your earliest convenience if you would like to discuss this matter or any products you have seen in the market.

Sincerely,

Monsour Baker
