HG2 **///** RUNNER

Overview:

The *HG2 Runners* Package is an extremely versatile emergency lighting system designed for maximum visibility with a minimal footprint. *HG2 Runners* were developed to enhance the outline of a vehicle's profile (side of vehicle), offering greater visibility through installation location, variable flash patterns and lighting intensity.

Our patent-pending designs feature super-bright, wide-angle LEDs, a high-impact CAB housing and an anodized black finished extruded aluminum mounting sleeve for stealth installation.
